The following is an examiner's statement of reasons for allowance: The prior art does not disclose, and the patent based on the parent application does not claim, a template matching method for a scanning electron microscope comprising the steps of adjusting the distance, dimension and/or the number of plural parts forming the template; nor does the prior art disclose nor the patent based on the parent application claim a method of detecting and evaluating a pattern based on an image obtained by scanning an electron beam which includes the step of skipping detection of the pattern when a distance and/or a number of plural parts forming the pattern is smaller than a predetermined threshold value. As is explained in paragraphs [0049] and [0050] of the specification, this skipping of the detection step when there are too few parts to evaluate a pattern or neighboring patterns are connected to each other (i.e. the distance between them is too small) avoids useless processes and thereby increases processing speed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack I. Berman whose telephone number is (571) 272-2468. The examiner can normally be reached on M-F (8:30-6:00) with every second Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John R. Lee can be reached on (571) 272-2477. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
